SPEC LIST 28-29

WHERE WE'RE HEADED FOR 2022

In a year full of unforeseen events, we felt it was more important than ever to continue to live up to your expectations. For next year's complete bike line, we doubled down on quality, refinements, and getting the details right.

The 2022 model year marks the 15th year we've made complete bikes at Kink. It's also our 27th year in BMX. We have come a long way since those first 5 bikes back in 2008. Our line has expanded to over 20 bikes, across 13 models, that are designed to suit riders of every age and budget.

Our new complete bike line should feel familiar. We kept the same models you know and love but updated their look. Decal kits tie into each model's name and colorway better than ever. The new graphics have been revisited, refreshed, and renewed across all models. We've also continued to push boundaries by creating new custom paint colors. Colors that are truly unique but still maintain Kink's clean and authentic aesthetic.

Throughout the year we have continued to take feedback from our riders, dealers, and distributors. While you won't find drastic specification or geometry changes for 2022, you will find tweaks and improvements across the line. From assembly and packaging, to tubing tapers and material finishes, we dug into the details.

We could not be happier with our 2022 Kink BMX complete bike line and we hope you enjoy them as much as we do. Whether it is with your friends, your kids, or having a solo session, we take pride in knowing that you'll have fun on the bikes we've built.

As always, thanks for supporting Kink BMX.

ATTENTION

THE FOLLOWING IMAGES ARE NOT PHOTOGRAPHS

Due to the pandemic's impact on manufacturing,
the following images are based on renderings to
ensure our production schedule remains on time.

As always, if you have any questions
please don't hesitate to contact us.
