THIS IS RADIO-MY20

WHO IS RADIO?-NOT JUST A BIKE COMPANY

Born from the foundations of one of the most successful and innovative rider owned bike companies of the 1990's Radio Bikes is proud to enter the dawn of it's second decade with a new focus and drive, cementing the core principals of the brand and bringing high quality and well-designed bikes to a wide array of customers across the globe.

We see each complete bike as an opportunity to give our customers a product that will inspire and ignite a life long love of riding bikes. Every Radio product is meticulously thought through, designed and constructed in a way to ensure that the bike looks and performs unlike anything else - on a budget to suit every form of rider.

Designed, developed, ridden and run by a team of dedicated bike riders, every Radio Bikes product is made with an injection of pure passion and innovation, all whilst having a constant finger on the fast beating pulse of the bike industry.

WHO IS A RADIO COSTUMER?-EVERYONE...

Far from just another generic brand to "fill in the gaps", Radio Bikes is unlike any other brand on the market. Radio was born out of the need for a line of bikes, that simply just didn't exist. Where many brands try to reduce the cost of the bike through downgrading quality and using cheaper components - we see a chance to innovate the design and to ensure the bike functions just as well, but at a more competitive price.

Every year that has passed, we have built onto the principal and now

the Radio Bikes line has evolved, refined and grown into the all-encompassing range, that caters to the need of every bike rider. From a 14" REVO for first time rider, an 18" Alloy DICE for the younger rider wanting to progress on a lighter bike, 26" and 29" LEGION wheelie bikes for the new wave of urban warriors, all the way to the PRO-level 26" SIREN Slopestyle bike for experienced mountain bike riders, **Radio has something for every customer!**

WHAT IS RADIO IN 2020?-BEYOND THE BIKE.

2020 is the year that Radio goes beyond. Radio has the unique advantage of being one of the most flexible and reputable bike companies on the market, and this is the year that we fully seal this claim. Having the past 10 years to solidify our direction and product line, this year is the year that Radio rises to take it's place among it's sister brands and is seen for the global all-encompassing bicycle brand it was always destined to be.

2020 is going to be a year that we **work together with distributions on a global level to build the brand presence of Radio** through event sponsorships, new PRO team riders, product innovations, world tours, increased media attention and jaw dropping video parts which will all be seen on a global level.

Our goal for this year is to make Radio Bikes a brand, that is talked about in every bike shop, at every skatepark and on every street corner.

If you love bikes, you'll love Radio.

COMPLETE
BIKES

RADIO RACELINE

combines over 20 years of experience of creating BMX bikes together with input from some of the world's best racers and industry players to create a revolutionary and all-encompassing line up of bikes built to take you to the finish line, unlike anything else.

Tested on the track and designed in conjunction with a team with BMX race knowledge spanning 3 decades, RADIO RACELINE enters the market with an incredibly well thought out and powerful line of pure bred race machines.

With a full line of bikes in all sizes from MINI all the way to PRO XL, the range kicks off with the entry level COBALT line that packs an enormous amount of technology and features into what essentially will be a rider's first race bike. Even from day one, we believe in giving the rider a bike which will allow them every chance to rapidly climb the ranks and on to the podium. The series then progresses to the mid-level XENON line, where the bikes themselves have been created with incredibly stiff and responsive frames with specific incremental spec and geometry changes, giving all riders the "perfect" feel no matter their age, size or ability.

Building off a hugely successful first year, the 2020 line of bikes sees the addition of exciting new colourways on both our COBALT and the XENON lines, as well as the brand new HELIUM Cruiser complete bike for all the 24" veterans out there wanting the perfect setup to take straight to the track and start getting results.

The logo for Radio Raceline features the word "RADIO" in a large, bold, italicized sans-serif font. Below it, the word "RACELINE" is written in a smaller, spaced-out, all-caps sans-serif font. A small trademark symbol (TM) is located at the top right of the "E" in "RADIO".

RADIOTM

courtesy of moorelarge.co.uk

From our entry level bikes all the way through to our aftermarket frames, all RADIO products are designed to feel comfortable, stiff and fast, exactly how a race bike should. You'll find no gimmicks on any of our bikes, no "goofy" tubing shapes or unnecessary features. Our bikes have been built from the ground up with race proven geometry and technology combined with clean, functional aesthetics designed to give you the best possible holeshot out of the gate.

RADIO RACELINE

combines over 20 years of experience of creating BMX bikes together with input from some of the world's best racers and industry players to create a revolutionary and all-encompassing line up of bikes built to take you to the finish line, unlike anything else.

Tested on the track and designed in conjunction with a team with BMX race knowledge spanning 3 decades, RADIO RACELINE enters the market with an incredibly well thought out and powerful line of pure bred race machines.

Building off a hugely successful first year, the 2020 line of HELIUM frames gains a healthy injection of exciting new colourways and a new XXXXL size option for riders wanting a lengthier steed. We're also proud to release our new disc brake mount allowing you to upgrade your HELIUM PRO frame into a full disc-ready setup in a matter of seconds.

20 PARTS AND
ACCESSORIES

photos by Steve Diamond Elements

From our entry level bikes all the way through to our aftermarket frames, all RADIO RACELINE products are designed to feel comfortable, solid and fast, exactly how a race bike should.

You'll find no gimmicks on any of our bikes, no "goofy" tubing shapes or unnecessary features. Our bikes have been built from the ground up with race proven geometry and technology combined with clean, functional aesthetics designed to give you the best possible holeshot out of the gate.
