

PRODUCT RANGE 2016

district 
FREESTYLE SCOOTER CO. ®

DISTRICT FREESTYLE SCOOTER CO.

was founded in 2007 as the pioneering brand of the modern freestyle scooter movement, setting the standard for scooter design, manufacturing and performance. Before District there was not a single brand on the market that offered custom freestyle scooter parts. District wrote the rules, others have only followed.

/// WE WRITE OUR OWN RULES OTHERS FOLLOW

The District team is driven by a single ideal, never be satisfied with the status quo. Innovation is at the very core of the brand and driven by the voices of those who ride their products. Each and every part, from a tighter clamp to a higher performing deck, has been engineered to advance the sport and allow riders to push their limits.

You won't find a single rider or shop owner throughout the world that is not aware of the District movement. District is the original freestyle scooter brand to separate top-quality equipment from the fold-up toys of the past.

Many of the sport's greatest riders have been involved with product development and testing from the very beginning. As a global team, District serves one mission: to forever change the art and sport of freestyle riding.

Today, District is a highly evolved and globally recognized brand with an unstoppable mission to create the absolute best freestyle scooter products in the world.

District proudly serves a diverse and international rider base with the highest performing products on the market. From the most hardcore rider, to the kid just hitting the street, District offers unparalleled freestyle riding.

Different by Design
